

## Directions

Add contents of package into clean water and apply equally to 200 tons of forage or apply entire packet to 140 tons of high moisture grains. For best results use entire mixture within 24 hours of mixing. When properly applied, 400,000 cfu/g of forage or 550,000 cfu/g of high moisture grains will be delivered.

**STORE PACKAGE IN  
A COOL, DRY AREA**

# Super

## Guaranteed Analysis

**Total Lactic Acid Producing Bacteria**  
≥ 94 Billion cfu/gm

**Net Weight: 800 grams**

## Ingredients

Maltodextrins, Dried Lactobacillus buchneri fermentation product, dye.
