

Dohrect Enject 1010 Series Console

Introducing the Next Generation of **Dohrect Enject Systems:** **DE-1010 & DE-1010X2**

U.S. Patent No. 6,443,369
Canada Patent No. 2,411,690
Other Patents Pending

Limited 2010 quantities available – currently accepting orders. First release shipping in July.*

Our customers have been asking and we have been listening. Our next generation of Dohrect Enject Systems has many newly added modifications and features including:

- A reliable pump with simple design providing easier pumping tube change-out than previous generation
- Semi-automated applicator for self-propelled forage harvesters
- Can be used to treat up to 2000 tons of silage with our two tank option**
- Includes a digital Flowmeter and Flow Sensor
- Console has an adjustable low level indicator, so you can choose the tank level you would like to be notified at for refill
- New wider range of flow rates:
1.9 Oz/Minute up to 49 Oz/Minute
- New wider treatable harvest range:
0.5 Tons/Minute up to 12 Tons/Minute**
- Electronically switched flush system with a larger 32 Oz. flush bottle
- Has three resettable usage accumulators
- **1010** Series consoles have a communication port for future connection with John Deere HarvestLab™

* Ship date subject to change. ** This varies based on mix rate.
